

WORLD LOGIC DAY

14 January 2022

THE MANY FACETS OF LOGIC

Besides being an essential tool for reasoning and arguing, Logic is nowadays a field of inquiry with a multitude of applications: from philosophy to social sciences, from pure mathematics to computer science. The World Logic Day 2022, supported by AILA (The Italian Association of Logic and its Applications) and SILFS (Italian Society of Logic and Philosophy of Sciences), is devoted to present the many facets of Logic by interviewing some of its main characters.

The event will be held in Italian and online.

Program

17:00 - 18:00

THE MANY FACETS OF LOGIC

An interview to

Melissa Antonelli (Università of Bologna)

Ivano Ciardelli (Munich Center for Mathematical Philosophy)
