Subject: World Logic Day 2021 – Letter of Support.

Dear Colleague,

On behalf of the IAPG - International Association for Promoting Geoethics, I express the full support of the Association to World Logic Day 2021.

The IAPG, member organisation of the CIPSH - International Council for Philosophy and Human Sciences and affiliated organisation of the IUGS - International Union of Geological Sciences, works to developing theoretical and practical activities covering a wide range of contents comprising philosophy of geosciences and ethics applied to geoscience-society interface and humanity-Earth system interactions.

Geoethics promotes a sound interaction between humans and nature, in which logic is the necessary rational support to develop critical thinking and build the responsible action of each individual, based on the scientific knowledge of the complex phenomena that govern reality.

If on the one hand nature arouses in human beings emotions and feelings that create a bond and strengthen their identity, on the other hand it is through observational scientific processes and logical-rational analyses that a solid knowledge of the relationships that structure natural reality it can be built, as the necessary foundation to live in health and safety on the planet.

Best regards,

Silvia Peppoloni
(IAPG Secretary General)
